

Environment Policy

Delta Civil (WA) Pty Ltd recognises the importance of caring for our environment, and that the principles of environmental sustainability must be rigorously applied in civil construction. We believe that our environmental management performance will reflect the quality of our work and the success of our company.

To protect the state of the environment in which we operate we will:

- Ensure the Company and all workers comply with Environmental regulations and other requirements placed upon it by Clients and other parties.
- Prevent pollution.
- Continually improve our people, systems and operational performance.
- Communicate with our employees, subcontractors and engage with other stakeholders to improve our environmental management performance.
- Conserve company and natural resources by careful management of emissions and discharges, and by minimising waste generation.
- Monitor and improve site, remedial and civil construction methods to minimise the environmental impact.
- Consider environmental issues in meetings with employees and the client.
- Control hazardous materials.
- Promote recycling and the use of recycled material.
- Protect and work carefully adjacent to water courses and prevent pollution.
- Improve energy efficiency.

This policy will be reviewed annually in consultation with employees. All levels of management are accountable for implementing and monitoring this policy in their area of responsibility
